

Digital Markets

The digital sector has become an essential facility in our economy and has transformed our lives in many ways. But there are increasing concerns that competition in digital markets does not work properly, leading to the creation of dominant platforms with persistent market power.

- What are central building blocks of digital market models?
- What is different about digital markets?

- What are the consequences of market power and the abuse of dominant positions in digital markets?
- How should digital markets be regulated or treated by competition policy?

VO: Introduction to work-horse models, data analysis, and policy responses

PS: Training on models and case studies

Lecturer: Markus Walz
